Providing yoU Practical Solutions

The Top 5 Reasons Why You'll Want To Work With Willetts Technology For Your Software and Tech Support

1 Dedicated to Human Service

We specialize in helping human service organizations leverage technology. We support thousands of human service workers across the Country. We understand HIPAA Compliance, and we like being a part of your mission to help people.

2 You'll Get a Professional Team, Not A "One-Man Band" Or Outsourced Help Desk Based In Another Country

We CAREFULLY select, hire, and train top-level professionals who get to know your organization. That way, you know exactly who is getting access to your network and data. We also have a deep "bench" of experts you can rely on to deliver efficient services, accurate recommendations and fast fixes to any problem you encounter and/or need you have.

3 Software Development AND Tech Support

We develop software solutions as well as provide tech support for computers and networks. Having one place to call for these services makes it easier and more cost effective for your organization.

4 NO Nickel-And-Diming

Our service agreements aren't full of clauses and exclusions. When we quote you a fee, you can know with confidence that is exactly what you will pay – not a dime more.

5 NO Long-Term Contracts

We keep our clients loyal by delivering excellent service – not by handcuffing them with a multi-year contract.

" Willetts Tech staff has made switching to EHR almost painless! We gave them reams of paper in the way of forms we have been using and filing in actual 3-ring binders. They took those forms and put them into a sleek system that will make accessing what we need much faster and more efficient. "
